1. This written opini	on is the first	(first, etc.)	drawn by this Inter	national Preliminary Examining Auth	hority.
2. This opinion contr	ains indications re	lating to the following it	ems:		À
I X Bas	sis of the opinion				
II Pri	ority				
III No	n-establishment of	opinion with regard to	novelty, inventive	step or industrial applicability	
IV Lac	ck of unity of inve	ntion			1
		nder Rule 66.2(a)(ii) wil ions supporting such sta		y, inventive step or industrial applica	ıbility;
VI Cer	rtain documents cit	ted			•
VII Certain defects in the international application					
VIII Certain observations on the international application					
3. The applicant is h	ereby invited to re	ply to this opinion.			
When? See the time limit indicated above. The applicant may, before the expiration of that time limit, request this Authority to grant an extension, see Rule 66.2(d).					
How? By	By submitting a written reply, accompanied, where appropriate, by amendments, according to Rule 66.3. For the form and the language of the amendments, see Rules 66.8 and 66.9.				
Also For an additional opportunity to submit amendments, see Rule 66.4. For the examiner's obligation to consider amendments and/or arguments, see Rule 66.4 bis. For an informal communication with the examiner, see Rule 66.6.					
If no reply is fil	led, the internation	al preliminary examinat	ion report will be	established on the basis of this opinion	on.
4. The final date by examination report	which the internation must be established	ional preliminary hed according to Rule 6	9.2 is: 23 FEBRU	ARY 2001

Inventive Step (IS) Claims Claims NONE Claims Industrial Applicability (IA) Claims NONE NO Claims NONE NO Citations and explanations Claims 1-17 lack an inventive step under PCT Article 33(3) as being obvious over Sheridan. Sheridan discloses a method of distributing images over the Internet comprising: a) harvesting images of different formats from a plurality of sites based on user-supplied information (see col 4, lines 42-4' col 9, lines 54-57, col 11, lines 23-36), b) creating thumbnail images corresponding to the harvested images (see col 5, lines 35-41), c) combining thumbnail images onto a page for presentation at a remote site (see col 5, lines 19-35). Sheridan does not teach compiling the thumbnail images onto a web page. The use of web pages for allowing access of information over the Internet is well-known in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to compiling and indexing one or more set of thumbnail images onto a web page for presentation at a remote site because it would have enabled a remote user to access the selected images using a conventional web browser.
